

Indigenous COVID-19 Vaccine and Booster Clinic

May 17 2022 – 10 to 3pm

Barrie Native Friendship Centre
175 Bayfield Street
Barrie, ON L4M 3B4

Who:

- **First Nations, Métis, and Inuit adults age 18 or older** and non-Indigenous adults living in the same household are now eligible to get a second COVID-19 booster if enough time has passed since their previous booster was received.
- This clinic will also be able to provide first boosters, or first or second doses to Indigenous children, youth, and adults who are eligible.

Walk-in appointments only

Indigenous COVID-19 Vaccine and Booster Clinics

When can I get my COVID-19 Vaccine or Booster?

	Dose/Booster	Age	Recommended Time Between Doses
1 st and 2 nd doses	First Dose	Age 5 or older	Whenever you are ready
	Second Dose	Age 5 to 11	8 weeks since the first vaccine dose
	Second Dose	Age 12 or older	8 weeks since the first vaccine dose
1 st booster	Booster	Age 5 to 11	No booster dose at this time
	Booster	Age 12 to 17	6 months after the second vaccine dose
	Booster	Age 18 or older	3 months after the second vaccine dose
2 nd booster	Second Booster	Age 12 to 17	No booster dose at this time
	Second Booster	Age 18 or older	5 months since previous booster dose Minimum interval (time between) 3 months

It is recommended that you wait 3 months after having COVID to have a COVID vaccine. If you are a person who is immunocompromised, your vaccine timing and recommendations may be a little different than what is in this chart.
